

Laser distance sensor

for the most extreme conditions – developed for you!

Explosion-proof laser distance sensors from Tippkemper-Matrix for contactless and precise measurement of distances in biogas digesters, repositories, gas storage tanks in the sewage plant industry, on digestion towers, on coarse screens (wastewater, solids, substrates) etc.

Application-proved and several times successfully in use!

"Contactless, precise, maintenance and wear-free"

The new laser distance sensor type LDH-AAA-FCB-TF from Tippkemper Matrix.

By using this sensor you are well positioned to meet all future requirements of the biogas and sewage plant industry.

Simple and customer-friendly setting of the required measurement parameters, lens heater to avoid the condensation on the optics, laser clocking for durability and safe operation all these parameters offer you the maximum of safety and reliability.

The solid and firm design as well as the low weight of this sensor is perfectly suitable for your application area e.g. directly mounted at the highest point of your weather proofing membrane.

Trust in almost 50 years of experience, in proven and innovative products and solutions from Tippkemper Matrix!
